## What is this product?

**Type:** Undertakings for Collective Investments in Transferable Securities (UCITS). The Fund is a sub-fund of Cramer Rosenthal McGlynn UCITS Plc. This Fund is managed by ONE Fund Management S.A.

**Term:** The Fund has an unlimited duration. The Fund may be terminated by the Directors, at their sole and absolute discretion, by notice in writing to the Depositary in certain events which are outlined in the prospectus. You may buy and sell shares on a daily basis.

**Objectives:** The Fund's investment objective is to provide long-term capital appreciation of your investment by investing primarily in US and non-US equity securities. The Fund will seek to achieve its objective by investing directly and/or indirectly (ie through derivative contracts and collective investment schemes) in equities across all industry sectors, including within the US and non-US markets as set out in the investment objectives and policies section of the prospectus. The Fund may invest in equity securities and other securities with equity characteristics including common and preferred stocks, warrants on equities, partnership interests in publicly traded companies, convertible securities and depositary receipts for such securities. The Fund will invest in futures, swaps, forwards, options, and contracts for difference ("CFD"). Futures are contracts that create an obligation to buy or sell another security on or before a specified future date. Forwards are similar to futures except that they are private agreements between two parties rather than standardised exchange-traded contracts. Options are contracts where the buyer has the right, but not the obligation, to buy or sell another security at a specified price on or before a specified future date. A swap allows counterparties to exchange one stream of cash flow against another stream. A CFD is an arrangement made in a futures contract where by differences in settlement are made through cash payments rather than delivery of physical goods or securities. The Fund may also, pending reinvestment, or if this is considered appropriate to the investment objective (for example due to market turmoil), invest up to 100% of its net assets on a short term basis in cash, cash equivalents and money market instruments. The Fund is actively managed and is not managed in reference to a benchmark. The Fund may measure its performance relative to an index for reference or investor communication purposes. The Fund does not operate any form of target to outperform a benchmark index. The Fund will not distribute any dividends. Income and gains of the Fund will be rolled up into the value of your shares. The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see "What are the costs?" below).

Environmental, social and/or governance (ESG) criteria are taken into account when selecting suitable investments.

The Depositary is Northern Trust Fiduciary Services (Ireland) Limited.

## Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario. USD 10 000 is invested.
