What is this product?

Type: Undertakings for Collective Investments in Transferable Securities (UCITS). The Fund is a sub-fund of Cramer Rosenthal McGlynn UCITS Plc. This Fund is managed by Waystone Management Company (IE) Limited.

Term: The Fund has an unlimited duration. The Fund may be terminated by the Directors, at their sole and absolute discretion, by notice in writing to the Depositary in certain events which are outlined in the prospectus. You may buy and sell shares on a daily basis.

Objectives: The Fund's investment objective is to provide long-term capital appreciation of your investment by investing primarily in US equity and equity related securities. The Fund invests a minimum of 70% of its assets in stocks/shares and equity related securities of U.S. and non-U.S. companies quoted on stock exchanges of the United States with market capitalisations within the range of the Russell 3000 Index. To maintain an adequate spread of risk, the Fund shall invest in securities of companies throughout the capitalisation range of the Russell 3000 Index and the Standard and Poors ("S&P") 500 Index. The Russell 3000 Index measures the performance of certain public companies primarily across the U.S. equity investible universe. The S&P 500 Index is a free-float capitalization weighted index that is comprised of 500 large-cap companies selected by the S&P Index Committee. The Fund is actively managed and is not managed in reference to a benchmark. The Fund may measure its performance relative to an index for reference or investor communication purposes. The Fund does not operate any form of target to outperform a benchmark index. Equity related securities include, but are not limited to, common and preferred stocks/shares and securities which can be converted into common stocks/shares and warrants. Warrants are a type of security that gives the holder the right to purchase (typically equity) securities from an issuer at a specific price within a certain timeframe. The Fund may also invest in equity securities listed or traded on the stock exchanges listed in Appendix 1 of the Prospectus. In order to identify the companies in which the Fund will invest, the investment manager analyses the value of the potential target companies relative to other companies, recent changes to such potential targets and whether or not there have been expressions of interest by other investors. The investment manager invests on a discretionary basis and does not invest in accordance with the composition of any index. The Fund will not distribute any dividends. Income and gains of the Fund will be rolled up into the value of your shares. The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see "What are the costs?" below).

Environmental, social and/or governance (ESG) criteria are taken into account when selecting suitable investments.

The Depositary is Northern Trust Fiduciary Services (Ireland) Limited.
